Art Unit: 1761

Claim 14 is allowed.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 13 is rejected under 35 U.S.C. 102(a) as being anticipated by Applicant's disclosure.

Applicant teaches that ethyl 4-(thioacetoxo) butyrate is a natural product obtained from mango (see page 1 of the specification).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's disclosure.

Applicant discloses that ethyl 4-(thioacetoxo) butyrate is a natural product obtained from mango (see page 1 of the specification).

The claims differ as to the use of the claimed compound in specific food products.

It is notoriously well-known that sulfur compounds are useful in modifying or enhancing taste properties (see pages 2-4 of the specification).

Art Unit: 1761

It would have been obvious to a person of ordinary skill in the art, at the time the invention was made, to use ethyl 4-(thioacetoxo) butyrate in different food products, such as chewing gums and confections, because the use of sulfur compounds to enhance taste properties in food products is well-known in the art.

The prior art cited is deemed to be relevant to the claimed invention.
